Biographical Subject Index to the Library of Congress Classification	

FOREWORD

Most cataloging staff in libraries have talked about the lack of a one-source index to the complete set of Library of Congress classification schedules for the past three decades. The need to have a one-source index to the complete set of Library of Congress classification schedules has long existed. This combined index meets such a necessity and, additionally, provides a data base which can be easily up-dated and revised when and as often as needed.

Librarians in all types and sizes of libraries should find this work a valuable source for aid in determining classification numbers, tracing Library of Congress classification practices, and approaching subjects from an alternative point of view. This work is not a "how to do it" handbook, but is a guide to the Library of Congress classification.

The personal name indexes will increase the accessibility of the collections which use the Library of Congress Classification system. These indexes will replace lengthy searches in the National Union Catalog. They will provide much useful information for libraries not accepting the P Z 3 and 4 schedules. The compilation of names, pseudonyms, and class numbers provides a valuable accessibility to literary and biographical works in all languages and times.

The author has seen a need and done something about it. The success of this work will depend on the use made of this work by catalogers and reference librarians in the field and their demand for updated and revised editions in the future.

INTRODUCTION AND USE

Indexes One, Two, and Three of the Combined Indexes to the Library of Congress Classification Schedules provide accessibility to classification numbers representing persons in the Library of Congress classification system. Sources for these numbers include the schedules, the *Additions and Changes* through December of 1973, *The Library of Congress Catalog, Books: Subjects 1965-69*, and microfilmed portions of the Library of Congress shelflist. (See page xxv for exact list of sources.)

In Index One, authors of literary works and their classification numbers are given in alphabetical order.

In Index Two, numbers for philosophers, musicians, historical figures, educators, scientists, etc., have been added to the "author numbers" from Index One. These biographical numbers, in alphabetical order, include multiple numbers for those people who have made major contributions in more than one field. Albert Schweitzer, for example, is represented by seven numbers: CT 1098.S45 (Biography), BV 3625.G3S25-45 (Missionary), ML 416.S33 (Musician), B 3329-S5 (Philosopher), R 507 S3 (Physician), BX 4827.S35 (Theologian), and Z8797.75 (Bibliography).

Index Three contains all material from Index Two arranged by classification number with headings for classes, sub-groups, and time periods when appropriate.

Index users should note that since the sorting for all indexes was done by a computer, "St." will not sort with "Saint" and "De La Mare" will come before "Dean," i.e., each group of letters is treated as a separate word by the computer.

Diacritical marks were transcribed according to the following table:¹

- ä in German, Finnish, Hungarian, Turkish, and Scandinavian languages is written AE.
- ö in German, Finnish, Hungarian, Turkish, and Scandinavian languages is written OE.
- ü in German, Finnish, Hungarian, Turkish, and Scandinavian languages is written UE.

- á in Icelandic is written AE.
- ÿ in Dutch is written OE.
- ð with crossbar is written OE.
- þ Icelandic thorn is written OE.

Each entry for Index One consists of a name and the classification number. An entry also contains the full name, name in another language, when that information is available, and names of other works by the same author.

If a specific table is referred to in an entry, the table is given in full with roman numerals. If a range of numbers is made by using arabic numerals, the table referred to is given in full and the table referred to is given in full.

When the schedule is referred to in an entry, the schedule is given in full. When the schedule is referred to in an entry, the schedule is given in full. When the schedule is referred to in an entry, the schedule is given in full.

The source of the information is given in square brackets. The symbols are { } for the source of the information. The symbols are { } for the source of the information. The symbols are { } for the source of the information.

A special problem is the treatment of Roman authors. Most of the "PA" schedules are in alphabetical sequence. In the "PA" schedules, the last name of the author is given, and an asterisk is used to indicate the first name.

in many cases that a table had been used for works about some people, yet no mention of such use was found in the schedules or the *Additions and Changes*. In all such cases, only the last digit of the number is in doubt, because only that digit ever seemed to vary. These problems can only be resolved through access to the entire Library of Congress shelflist.

Some authors may purposely have two or more literature numbers. The obvious examples would be those with a PZ number and a PR, PS, PQ, or other P number. A less common occurrence is the author with numbers in Swedish literature and in English literature, or in French literature and in one of the areas of French literature outside of France.

Others accidentally have two numbers, or share a number with another author. These very rare shelflisting errors were identified when indexing from the LC shelflist microfilm. Numbers were recorded as found.

Names taken from *Books: Subjects* and from the LC shelflist are given in their correct bibliographic form; other names should be verified before use of the name as a main or added entry.

Tables are printed on pages xvii to xxxvi. These tables include all revisions through March, 1975. Note that while certain tables are applied only to multiple-number, or multiple-Cutter-number authors, several tables exist which are to be applied as needed for authors or philosophers with only a single number or a single Cutter number. Therefore, a special table is provided for each author listed in Index One.

Index Four, the *Geographical Name Index* and Index Five, the *Subject Keyword Index*, are described fully in the introductions to those indexes.

While these indexes were designed to aid beginning catalogers, catalogers in small libraries, and Dewey catalogers faced with reclassification to LC, they are not intended to substitute for knowledge of the LC system and schedules. The user should not try to classify from these indexes alone. There may be tables to be applied to the given number; scope notes to be considered; a range of numbers to be subdivided; or numbers from more than one schedule given for a name.

Index Three should have special value to those libraries accepting the PZ 3 and PZ 4 classification.
